

The workshop is intended for thesis students, PhD students, and early-career researchers interested in cultural heritage and digital modeling.

Its aim is to open an initial discussion on cities considered particularly fragile from a socio-political perspective and to launch a brainstorming session on potential directions and activities for the project over the next two years.

Heritage Visualisation and Potential Speculative Reconstructions in Digital Space

The Medieval Church of St. Anne in
Famagusta, Cyprus

- Journal Article by Michael J. K. Walsh and Rachele Bernardello
- This article is concerned with the 14 century church of St. Anne's in the historic walled city of Famagusta, Cyprus, as a site for transdisciplinary investigation embedded,... Read more
