Personal data and education

Born in Cremona on 21/02/1964. Married, two kids (Michele - 24, Bianca - 17).

Diploma di V anno in Pianoforte

Maturità scientifica with grade 60/60

Apr 1990 MsC Laurea in Information Sciences, University of Pisa

Sep 1994 PhD in Computational Mathematics with a dissertation entitled: *Convergence Study of the Conjugate Gradient Method for Eigenvalue Computation of Sparse Matrices*.

Participation to Courses and Schools

June 1990 Courses of Numerical Analysis (Kershaw), Complex Analysis (Gamelin) and Functional Analysis (Bercovci) at the SMI in Perugia.

June 1991 Venice Summer School on Applied Mathematics

July 1992 Courses: Iterative Methods for Eigenvalue Problems (Saad) and Multigrid (Bramble) at the SMI in Cortona.

June 1994 Summer School on *Parallel Numerical Algorithms*, Peñiscola, Spain.

July 1996 NATO ASI Summer School on *Iterative Methods*, Las Palmas, Spain.

July 1997 Summer School in *Advanced Numerical Approximation of Nonlinear Hyperbolic Equations*, Cetraro

Academic positions

1995 – 2007 Ricercatore universitario (Assistant Professor) SSD: MATH-05/A (Numerical Analysis)

Oct 2007 – Associate Professor (confirmed on Oct 2010), SSD: MATH-05/A, University of Padova, (Present position) Faculty of Engineering. Since January 1, 2012, he is member of the Department of Civil Environmental and Architectural Engineering, University of Padova

16/12/2013 Declared eligible for a position of full professor by the committee for the National Scientific Habilitation in the MATH-05/A Scientific Sector (Numerical Analysis).

13/04/2021– Declared eligible for a position of full professor by the committee for the National Scientific

13/04/2033 Habilitation in the MATH-05/A Scientific Sector (Numerical Analysis).

Present responsibilities at the ICEA Department

2018– Member of the teaching staff of the PhD programme in Civil Environmental and Architectural Engineering

2024-25 Member of the board per il Miglioramento della Didattica, progetto Dipartimento di Eccellenza

Programming Languages and Operative Systems

Advanced L^AT_EX, Linux, Fortran90, Matlab

Intermediate MPI

Software developements

(In collaboration with F. Sartoretto) Parallel *Deflation-accelerated Conjugate Gradient* (PDACG) Fortran solver for large and sparse symmetric eigenvalue problems. <https://www.dmsa.unipd.it/~sartoret/Pdacg/pdacg/overview.html>

Languages

Italian Mother Tongue

English Excellent (written) Good (oral)

Spanish Excellent, both written and oral

Teaching

Teaching in the Faculty (now School) of Engineering, University of Padua

Unless differently stated, the courses listed below consist in (at least) 48 hours, mostly 72 hours each. Different colors if the course is delivered either in **English** or in **Spanish**.

BsC		MsC	
Course Name	# courses delivered	Course Name	# courses delivered
Calcolo Numerico	40	Calcolo Numerico	3
Mathematical Analysis	17	Numerical Methods	1
Statistical Methods ¹	1	Maths II (Environmental Statistics) ¹	4
Mathematics ¹	4	Numerical Methods for Differential Equations	7
# BSC courses	62	# MSC courses	14
1997, 2003–19, 21–24: Summer Courses (20 hrs) in Calcolo Numerico			22

¹ Courses offered by the School of Agricultural Sciences.

JAN 2011 (MsC) **Iterative methods for linear and nonlinear equations**, within the Course: Fundamentos de matematica Aplicada. Polytechnic University of Valencia.

PhD Courses

2017 – present **Numerical Methods** PhD School in Sciences of Civil Environmental & Architectural Engineering.

Feb 2019 **Iterative Methods and Preconditioning**, School of Maths (University of Edinburgh).

2004–17 **Numerical Linear Algebra** PhD School in Sciences of Civil & Environmental Engineering.

Winter 2007 **Métodos Numéricos Avanzados** Polytechnic University of Valencia.

Winter 2006 **Iterative Methods for Large Matrices. Application to PDE and Optimization problems**, School of Maths (University of Edinburgh).

2001–04 **Optimization and Interior Point Methods** PhD School in Computational Mathematics.

2003–04 **Mixed Finite Elements and Finite Volumes for the convection diffusion equation** PhD School in Computational Mathematics.

Recent thesis direction: PhD

2022 Co-supervisor of the student *Fariba Bakrani Balani*, PhD in Applied Mathematics

Recent thesis directions: MsC

2024 Mathematical Engineering: Alessandro Reami

2021 Mathematical Engineering: Andrea Baldina

2019 Mathematical Engineering: Filippo Zanetti

2015 Information Engineering: Alain Tcheuckam

Recent thesis directions: BsC

2022 Aerospace Engineering: Vittorio Candiello

2021 Aerospace Engineering: Riccardo Magri

2019 Mechanical Engineering: Nicolò Cappello

2019 Aerospace Engineering: Filippo Zanetti

2018 Aerospace Engineering: Martino Nozza

2017 Aerospace Engineering: Niccolò Tonicello

2016 Mechanical Engineering: Riccardo Tomelleri

2015 Mechanical Engineering: Michele Zecchin

Scientific Activity

I have been working in the following fields.

Numerical Linear Algebra

Matrix-free preconditioners

1. Parallel polynomial preconditioners for Krylov solvers
2. Matrix-free preconditioners for the dominant λ -modes of a nuclear power reactor

Low-rank update of preconditioners for sequences of linear systems arising from

1. Discretization by Finite Elements of transient PDEs
2. Eigenvalue problems
3. Nonlinear problems
4. Constrained optimization problems solved via the Interior Point method

Sequential and parallel algorithms for large and sparse eigenvalue problems. Development of a CG-based method for computing the leftmost eigenpairs of SPD matrices.

Parallel algorithms based on approximate inverses to accelerate Krylov subspace methods for large and sparse linear systems.

Indefinite block preconditioner for (multiple) saddlepoint linear systems

1. Nonlinear convex constrained optimization by the Interior Point method
2. Mixed Finite Element discretization of the Navier-Stokes equations at high Reynolds number
3. Coupled Consolidation problem (Biot's law)

Discretization of PDEs

High-order implicit Runge-Kutta methods for the Stokes equation

Mixed Finite Elements and Finite Volumes

1. for the Black-Oil Model in reservoir simulations
2. for the coupled flow and transport equations in porous media

Operator Splitting for the transport equation

Nonlinear systems

Newton-like methods for nonlinear systems arising from the Mixed Finite Element discretization of the Richards equation.

Developments of Quasi-Newton preconditioners for the linearized Newton systems

Approximation of $\exp(A)\mathbf{v}$

Chebyshev and Leja series expansion of the scalar functions e^x and $\phi(x) = \frac{e^x - 1}{x}$ for the solution of large systems of ODEs through the computation of the exponential of the spatial discretization operator. Application to convection-diffusion-reaction equations.

List of Publications

Il numero d'ordine in rosso enumera le pubblicazioni indicate alla domanda.

Preprints

- 2025 [1] L. Bergamaschi, A. Martínez, J. Pearson and A. Potschka, Eigenvalue bounds for preconditioned symmetric multiple saddle-point matrices, *Linear Algebra and its Applications*, submitted, 2025
- [2] L. Bergamaschi, A. Martínez, and M. Ferronato, Triangular preconditioners for double saddle point linear systems arising in the mixed form of poroelasticity equations [arXiv:2505.06043 \[math.NA\]](#), 2025
- [3] V. Mottola, A. Tamburrino, L. Bergamaschi, A. G. Chiariello, E. Corsaro, C. Forestiere, G. Rubinacci and S. Ventre, QR-recursive compression of volume integral equations for electromagnetic scattering by large metasurfaces *IEEE Transactions on Antennas and Propagation*, submitted, 2025

Present research collaborations

Parallel in time solvers and preconditioners for the all-at-once Runge Kutta discretization in fluid dynamics with J. Pearson, University of Edinburgh, S. Leveque, SNS Pisa, A. Martínez, University of Trieste.

Preconditioners for multiple saddle-point linear systems J. Pearson, University of Edinburgh, A. Potschka, TU Clausthal, A. Martínez, University of Trieste.

Preconditioners for dense linear systems arising in huge electromagnetic scattering S. Ventre, Università di Cassino

Membership

Member of the following institutions:

- GNCS Italian Group for Scientific Computing.
SIAM Also member of the following groups: LA – OPT – GS – CSE – SC
UMI Italian Mathematical Union.
SIMAI Italian Applied Mathematical Society.
EMS European Mathematical Society.
ILAS International Linear Algebra Society

Research visits

- 1993 Applied Mathematics and Simulation Group, CRS4, Cagliari. Project: *Numerical Methods for Reservoir Simulation* (6 months)
- 1994 Applied Mathematics and Simulation Group, CRS4, Cagliari (5 months)
- 1995 Applied Mathematics and Simulation Group, CRS4, Cagliari (4 months)
- 2006 School of Maths (University of Edinburgh) under the European project HPC-Europa. (5 weeks)
- 2007 Polytechnic University of Valencia, under the European project HPC-Europa. (4 weeks)

2008– Short visits at the Applied Mathematics Department, Polytechnic University of Valencia, present collaboration with prof. Rafael Bru and with prof. José Marín.

Awards

2004 Best paper award, year 2004, *Computational Optimization and Applications*.

Projects headed as Principal Investigator

- 2024 – 26 Local PI of the PRIN project 2022 cod. 2022AKNSE4_005 (settore PE1) – CUP C53D23002420006, *Variational and analytical aspects of geometric PDEs* (67.5 KEuros)
- 2024 – 25 PI of the B-type ISCRA project: ARKEVO: *All-at-Once Runge Kutta methods for EVOlutionary models*.
- 2022 – 24 PI of the University of Padua (BIRD) project *Linear and nonlinear algebra in physics-informed neural networks with application to real life models* (20 KEuros)
- 2022 – 23 PI of the C-type ISCRA project: PRESTO
- 2021 – 26 PI of the Ministry of University funded project (DOR) *Discretization methods and iterative solvers for the simulation of mechanical and fluid-dynamics processes in porous media*. (approx. 100 KEuros)
- 2019 – 21 Group Leader of the project *Matrix-Free Preconditioners for Large-Scale Convex Constrained Optimization Problems (PRECOOP)* in the framework of the “Visiting Programme” funded by the CaRiPaRo foundation. (25 KEuros)
- 2019 – 21 PI of the Ministry of University funded project (DOR) *Discretization methods and iterative solvers for the simulation of mechanical and fluid-dynamics processes in porous media*. (approx. 35 KEuros)
- 2018 – 19 PI of the C-type project: *UPdates of SCALable preconditioners in geomechanical applications (UPSCALE)* under the ISCRA (Italian SuperComputing Resource Allocation) CINECA project.
- 2017 – 18 PI of the C-type ISCRA project: *Low-rank acceleration of parallel preconditioners (LOWRA)*
- 2017 – 18 PI of the GNCS project *Numerical methods for large constrained optimization problems and applications*
- 2016 – 18 PI of the University of Padua (BIRD) project *Stable and efficient discretizations of the mechanics of faults*. (25 KEuros)
- 2013 – 15 PI of the Ministry of University funded project (DOR) *Methods and numerical algorithms for the simulation of processes in porous media*. (approx. 65 KEuros)
- 2014 PI of the C-type ISCRA project: *Scalable PREconditioners for Advanced Discretizations of geomechanical models (SPREAD)*.

Participation to projects (most recent/important)

- 2018 – 20 Progetto finanziato dal Ministero Spagnolo per la Ricerca Scientifica: *Problemas matriciales: computación, teoría y aplicaciones*
- 2020 – 21 Progetto GNCS *Ottimizzazione e algoritmi lineare avanzata per problemi governati da PDE*
- 2019 – 20 Progetto GNCS *Tecniche innovative e parallele per sistemi lineari e non lineari di grandi dimensioni, funzioni ed equazioni matriciali ed applicazioni*
- 2018 – 19 Progetto GNCS *Metodi numerici per equazioni lineari, non lineari e matriciali con applicazioni*

- 2010 – 12 Progetto MTM2010-1.974 finanziato dal Ministero Spagnolo per la Ricerca Scientifica: *Solución iterativa de sistemas lineales y aplicaciones*
- 2007 – 09 Progetto PRIN 2007: *Metodi e modelli numerici avanzati con applicazioni di fluidodinamica e geomeccanica ambientale*.
- 2004 – 06 Progetto PRIN 2004: *Modelli numerici per flussi multifase e deformazione del suolo*.
- 2000 – 02 Progetto PRIN 2000: *Metodi e modelli numerici per la soluzione dei problemi di contaminazione di acquiferi e subsidenza del sottosuolo dovuta a estrazione di fluidi*.
- 1997-2001 RACOS Project: *Radionuclide Contamination of Soils and Groundwater at the Lake Karachai Waste Disposal Site (Russia) and the Chernobyl Accident Site (Ukraine): Field Analysis and Modeling Study*. FP4 Inco-Copernicus, finanziato dall'Unione Europea.
- 1997-1999 Progetto PRIN 1997: *Studio di metodi non lineari per modelli FEM di flusso, trasporto e deformazione di mezzi porosi*.
-

Conference Organization and participation to editorial boards

- 2025 Organizer of the minisymposium: *Iterative methods and preconditioners for (multiple) saddle point linear systems* at the 30th Biennial Conference on Numerical Analysis, Glasgow, June 2025
- 2024 Member of the Scientific/Organizing Committee of the workshop *PINN-PAD: Physics Informed Neural Networks in PADova*, Padova February 2024
Member of the Scientific Committee of the *8º Encuentro ALAMA: Álgebra Lineal, Análisis Matricial y Aplicaciones*, Gijon (Spain) June 2024
- 2021 **Guest Editor** of the Special Issue Entitled *Linear Algebra, Matrix Analysis and Applications*. Journal: Computational and Mathematical Methods.
Organizer of the minisymposium: *Recent advances in polynomial preconditioner for Linear Algebra Problems* at the SIAM Applied Linear Algebra Conference, New Orleans.
- 2020 Co-Organizer of the Workshop: Numerical Linear Algebra for PDEs and Large Scale Optimization, Padova, 17–18 February
- 2019 Co-Organizer of a miniworkshop within the ICIAM conference, Valencia, Spain
Co-Organizer of the Workshop: Advances in Linear Algebra and Huge-Scale Optimization, Edinburgh, 1–2 July
- 2018 – 2022 **Associate Editor** of the Journal **Computational and Mathematical Methods**, Wiley.
- 2018 Co-Organizer of a miniworkshop within the CMMSE conference, Cadiz, Spain
Co-Organizer of a miniworkshop within the SIAM Applied Linear Algebra Conference, Hong Kong.
Co-Organizer of the Italian Workshop on Numerical Linear Algebra: **Due giorni di Algebra Lineare Numerica**, Padova.
- 2017 Co-Organizer of a miniworkshop within the CMMSE conference, Cadiz, Spain
- 2013 Co-Organizer of the **SIAM Conference on Mathematical and Computational methods in the Geosciences**. Padova.
- 2012 Co-Organizer of a miniworkshop within the SIAM Applied Linear Algebra Conference, Valencia.

- 2010 Member of the Editorial Board of the **7th Conference on Engineering and Computational Technology**, Valencia.
- 2000 Organizer of a miniworkshop within the SIAM Applied Linear Algebra Conference, Raleigh, USA.

Talks at Conferences (in boldface if invited)

- 2024 – Mathematical Modelling in Engineering & Human Behaviour, Valencia, July 2024. *Preconditioner for double saddle-point linear systems with applications in Geomechanics*
- ALAMA2024 meeting. Linear Algebra, Matrix Analysis and Applications, Gijon, Spain, June 2024. **Spectral analysis of block preconditioners for double saddle-point linear systems. Applications to PDE-constrained optimization**
- 2023 – Conference: Exploiting Algebraic and Geometric Structure in Time-Integration Methods, Pisa, **Parallel-in-Time Solvers for the All-at-Once Runge-Kutta discretization**
- 24th SIAM Conference on Applied Linear Algebra, Paris, May 2024. **A Survey on Block Preconditioners for Linear Systems in Interior Point Methods for Convex Constrained Optimization**
- Convegno SIMAI, Matera. *Parallel-in-Time Solvers and SVD-based preconditioners for the Runge-Kutta discretization of the All-at-Once Stokes Problem*
- Numerical Analysis in the 21th century, Oxford, *Parallel matrix-free polynomial preconditioners for flow simulations in discrete fracture networks*
- 26th Biennial Conference on Numerical Analysis, University of Strathclyde, Glasgow, **Block triangular preconditioners for double saddle point linear systems**
- GNCS Meeting on Tecniche avanzate per problemi evolutivi: discretizzazione, algebra lineare numerica, ottimizzazione, Bologna, **SVD preconditioners for All-at-Once Runge–Kutta Discretization**
- SIAM Conference on Computational Sciences and Engineering, Amsterdam. *Parallel-in-Time Solver for the All-at-Once Runge–Kutta Discretization*
- 2022 – ALAMA 2022–ALN2gg Linear Algebra, Matrix Analysis and Applications Alcalá de Henares, *Parallel Matrix-free polynomial preconditioners for fractured porous media models*
- 2021 – 14th WCCM – ECCOMAS, **Massively parallel polynomial preconditioners for large linear systems arising in structural mechanics**
- 23th SIAM Conference on Applied Linear Algebra, **Parallel Newton-Chebyshev Polynomial Preconditioners**
- SIAM Conference on Mathematical and Computational Issues in the Geosciences, **HPC Polynomial Preconditioners for Block Linear Systems Arising in Large-Scale Geoscience Applications**
- EURO 2021, **A New Preconditioning Approach for an Interior Point–Proximal Method of Multipliers for Linear and Convex Quadratic Programming**
- 2019 – XXI UMI National Conference, Pavia. **Efficient preconditioning of the normal equations for large LPs**
- IX ICIAM Conference, Valencia **Recent advances in low-rank updates of preconditioners**

- The 18th International Conference on Computational and Mathematical Methods for Science and Engineering, Rota (Cadice). Recent advances in low-rank updates of preconditioners for nonlinear problems
 - Workshop: Advances in linear algebra and huge-scale optimization, Edinburgh. **Efficient preconditioning of the normal equations for large LPs**
 - V Jornadas ALAMA, Valencia. **Recent advances in low-rank updates of preconditioners: applications to nonlinear systems, eigenvalue problems and sequences of shifted linear system**
- 2018
- New directions in applied linear algebra, numerical methods for PDEs, and applications, Edinburgh. **Low-rank update of preconditioners for sequences of linear systems.**
 - SIAM Applied Linear Algebra, Hong Kong. **Spectral preconditioners for sequences of ill-conditioned linear systems.**
 - The 18th International Conference on Computational and Mathematical Methods for Science and Engineering, Rota (Cadice). **A combination of full-rank and low-rank update of the constraint preconditioner.**
 - The 16th EUROPT Workshop on Advances in Continuous Optimization, Almeria (Spain). *A combination of full-rank and low-rank update of the constraint preconditioner.*
- 2017
- The 17th International Conference on Computational and Mathematical Methods for Science and Engineering, Rota (Cadice). **Spectral acceleration of the Jacobi-Davidson method.**
 - Conference on Structured Matrices in Numerical Linear Algebra: Analysis, Algorithms and Applications, Cortona. **Spectral Low-rank Preconditioners for Large Linear Systems and Eigenvalue Problems.**
 - Parallel Computing (ParCo2017), Bologna. *Spectral acceleration of parallel iterative eigensolvers for large scale scientific computing.*
- 2016
- The 5th IMA Conference on Numerical Linear Algebra and Optimisation, Birmingham. *BFGS-like updates of constraint preconditioners for the PCG solution of interior point linear systems.*
- 2015
- The 13th EUROPT Workshop on Avances in Continuous Optimization, Edinburgh. *BFGS preconditioners for the normal equations arising in the Interior Point solution of constrained optimization problems.*
 - SIAM Applied Linear Algebra, Atlanta. **BFGS-like updates of constraint preconditioners for saddle point linear systems arising in convex quadratic programming.**
- 2014
- First Joint International Meeting RSME-SCM-SEMA-SIMAI-UMI, Bilbao (Spain). **Tuned preconditioners for iterative SPD eigensolvers.**
- 2013
- SIAM Computational Science and Engineering, Boston (USA). **Quasi-Newton Update of Preconditioners for the Linearized Newton System Arising from 3d Discretizations of Groundwater Flow Models.**
 - Due giorni di algebra lineare numerica, Roma. *Efficiently preconditioned Inexact Newton methods for large symmetric eigenvalue problems.*
 - The 11th EUROPT Workshop on Avances in Continuous Optimization, Firenze. **Low-rank updates of preconditioners for symmetric eigenproblems.**

- 2012 – Recent developments in the solution of indefinite systems, TU Eindhoven. **Relaxed Mixed Constraint Preconditioners for Ill-conditioned Symmetric Saddle Point Linear Systems.**
- SIAM Applied Linear Algebra, Valencia. **Relaxed mixed constraint preconditioners for ill-conditioned symmetric saddle point linear systems.**

Invited talks

- 2022 – ERGO afternoon, ERGO speaker, **Quasi-Newton preconditioners: Motivation and Theory**, Edinburgh, November 2022.
- 2017 – **Spectral preconditioners for large linear systems and eigenvalue problems** Dipartimento di Matematica, University of Bologna.
- 2012 – **Metodi iterativi per problemi agli autovalori per matrici sparse e di grandi dimensioni** Dipartimento di Matematica, University of Udine.
- 2009 – **Preconditioning Saddle Point Matrices**, Dipartimento di Matematica Applicata, Polytechnic University of Valencia (UPV).
- 2006 – **Quasi Newton preconditioners for the Inexact Newton method**. School of Maths, University of Edinburgh.
– **Polynomial approximation to the Matrix Exponential for Large Systems of ODEs**, Dipartimento di Matematica Applicata, UPV.
- 2005 – **Iterative methods for Saddle Point problems**, Dipartimento di Matematica Applicata, UPV.
- 2004 – **Iterative methods for the generalized eigenvalue problem**, Dipartimento di Matematica Applicata, UPV.
- 2003 – **Metodi del punto interno in ottimizzazione non lineare**, Modena, Dipartimento di Matematica.
- 2000 – **Introduction to Galerkin Finite Elements for the Diffusion Equation in Porous Media**, Dipartimento di Matematica Applicata, UPV

Review activity

I have been serving as a reviewer for more than 50 Journals in the fields of Numerical Analysis, Optimization and Parallel Computing. A partial list follows

- Applied Mathematics Letters
- BIT Numerical Mathematics
- Computer and Mathematics with Applications
- Computers and Operational Research
- Electronic Transactions on Numerical Analysis (ETNA)
- IMA Journal of Numerical Analysis
- Journal of Computational and Applied Mathematics
- Journal of Supercomputing
- Mathematical Programming
- Numerical Algorithms
- Numerical Mathematics: Theory Methods and Applications
- SIAM Journal on Numerical Analysis
- SIAM Journal on Scientific Computing
- Applied Numerical Mathematics
- Computational Optimization and Applications
- Computer Methods in Applied Mathematics and Engineering
- Electronic Journal of Linear Algebra
- European Journal of Operational Research
- International Journal on Computer Mathematics
- Journal of Parallel and Distributed Computing
- Linear Algebra and its Applications
- MathSciNet
- Numerical Linear Algebra with Applications
- Parallel Computing
- SIAM Journal on Optimization
- SIAM Journal on Matrix Analysis and Applications
