

Ocean energy development in Europe: current status and future perspectives

Prof. Peter Frigaard
Department of Civil Engineering
Aalborg University (DK)

Monday 24 Feb 2020
14:15-16:15

Room CM - GEOMAR Palace
v. Ognissanti 39 - Padova

Prof. Peter Frigaard, Aalborg University, is a world wide recognized expert in Marine Renewable Energy. There is no doubt as to the relevance of maritime engineering for the European economy, nor that the response of the sector to the economic crisis has been increasingly focused on innovation-driven processes. The rising demand for more sustainable practices and low-carbon energy sources are crucial factors in the present and future context of the maritime sector and in the developments in the field of offshore renewables. The seminal will present the Danish experience, documenting and promoting successful skills and good practices as well as failures and lessons learned.
