

Multi-Physics Modeling of Concrete and Heterogeneous Materials

October 24-25, 2013 – ENS Cachan

The workshop is organized within the **Project Vinci** funded by the “Università Italo Francese” of Turin to support the collaboration between the “Scuola di Dottorato in Scienze dell’Ingegneria Civile e Ambientale” of Padua and the “Ecole Doctorale Sciences Pratiques” of Cachan. The workshop is supported by Ecole Française du Béton. It aims at promoting the formation of doctoral students.

The themes of the workshop are:

- Concrete modeling and experimental behavior;
- Porous media modeling;
- Multi-scale modeling;
- Composite materials and structures;
- Innovative computational methods for non-linear problems.

Registration

Attendance is free.

Deadline: October 20th.

Registration includes free lunches and coffee breaks.

The number of participants is limited.

Organizing Committee

Giuseppe SCIUME' ♦ giuseppe.sciume@dicea.unipd.it

Farid BENBOUDJEMA ♦ farid.benboudjema@dgc.ens-cachan.fr

Caroline DE SA ♦ desa@dgc.ens-cachan.fr

Location and access

The workshop will take place at ENS CACHAN (amphithéâtre CHEMLA), in CACHAN, 20 min from Paris.
